2021-22 IMMUNIZATION REQUIREMENT FOR CLASS OF 2022

Dear Parents/Guardian,

The State of Indiana has requirements for Seniors for the 2021-22 school year that may affect your student attending the upcoming school year. The Indiana code requires students in 12th grade to provide documentation of the following:

- **Two doses Meningococcal (MCV4) vaccine (if their first MCV4 vaccine was given before the age of 16. Students who received the first MCV4 vaccine on or after their 16th birthday have met the requirements.**
- **Two doses of Hepatitis A (Hep A) vaccine (at least one is required by start of school year)**

We highly recommend that you talk with your child's health care provider to see if your child will need to receive the vaccinations before the beginning of the 2021-22 school year.

If your child does receive the MCV4 or Hep A vaccine, please provide documentation to your student's school nurse so that the immunization information can be added to his/her health file. If your student has exemption for vaccinations currently, this does not pertain to your student. If you choose not to vaccinate your student, an exemption form or letter must be completed. The clinic needs an exemption for vaccination form or letter completed and on file prior to the start of school.

Email to: hhsclinic@hse.k12.in.us

Fax: **317-594-0189**

Any student who does not provide documentation of the required immunizations to his/her school will not be allowed to attend school in the Fall until updated immunization information has been provided.

If you have questions and are unable to use email, please call the High School Clinic at 317-594-4350 and a nurse will assist you.

Sincerely,
